EUROMOT

This is EUROMOT

OUR MISSION

OUR MISSION

Internal Combustion Engines are at the **heart of modern societies**. They are used in a wide range of applications from 1 to more than 100,000 kW power:

- lawn/garden and recreational equipment;
- construction, mining, material handling, agricultural and forestry equipment;
- commercial marine and seagoing vessels, workboats, pleasure boats; and
- pumps and compressors, rail traction, power generation.

Our membership includes all **major manufacturers** of Internal Combustion Engines in Europe and the World, spark ignition and compression ignition, **representing 85% of the EU market**. Our members employ approximately 200,000 highly skilled and motivated men and women all over the world. The European market turnover for the business represented exceeds 25 billion Euros.

Established in 1991, our primary focus has been communicating the assets of IC engine power to regulators worldwide. We provide **reliable know-how** on advanced engine technologies in general and on environmentally efficient and cost-effective product regulations. We partner with other associations and institutions around the world to develop **the right regulation for the local or global environment** while sustaining mobility and economic growth in a modern transboundary society.

OUR MEMBERS

OUR BUSINESS

OUR BUSINESS

ACTIVITIES

Environment • Air Quality & Health • Transport & Mobility • Climate Action • Sustainable Production & Consumption • Resource Efficiency • Competitiveness • Energy Networks ...

ISSUES

Nonroad Mobile Sources • Stationary Sources • Cogeneration • Marine and Inland Navigation Vessels • Boats • Rail Traction • Clean Fuels • Smart Grids • Waste • Noise ...

PARTNER AUTHORITIES

European Commission • European Parliament and Council • United Nations (IMO, UN ECE) • World Bank Group (IFC) • CEN / ISO • National Authorities (EU Member States, USA, JAPAN, BRIC) ...

NETWORK

European & International Engine and Equipment Manufacturers • Ship Operators & Boat Builders • Oil Companies • Classification Societies • Rail Operators • Truck & Bus Industry • Electric Power Suppliers • R & D • Certification & Testing ...
